

生成世界设计比较问卷

完整试填材料 / Pilot packet

分配码：P001 仅供该编号使用，不可多人重复填写。

目的与材料

你将阅读四组 A/B 世界设计。每组来自同一个生成要求，来源名称隐藏，没有预设赢家。只评价所示书面设计，不评价真实运行效果、图像质量或游玩体验。

材料按统一字段数量、原始顺序和词数上限摘录；[截断 / omitted] 表示原文继续。未展示不代表完整世界中没有该内容。文字更长、细节更多本身不等于更好。英文材料保持原文，请仅在能独立阅读时参与，不要让模型或他人代评。

参与与数据

预计约 20–30 分钟，需通过试填校准。参与自愿，可随时停止，不能判断时选“无法判断”。记录匿名编号、经验、评分、可选评论，用于学术汇总分析及去标识化报告。请勿填写姓名、邮箱或其他个人信息。评论引用需在最后单独勾选同意。

本纸本不会自动上传。完成后按邀请人的方式交回；交回前可自行销毁，之后可凭分配码向邀请人申请撤回，汇总公开后可能无法撤回。研究联系渠道为本问卷邀请人；开始前可向其咨询数据保存、报酬和研究安排。不要在本问卷上写联系人或自己的身份。

同意与背景（不符合任一必填条件请停止）

☐ 我年满 18 岁。 ☐ 我能独立读懂英文材料。

☐ 我已阅读说明，自愿同意按此方式参与研究。

文字冒险／角色扮演游戏体验（可选）：

☐ 没有 ☐ 偶尔 ☐ 经常 ☐ 不回答

是否参与过本系统开发或看过详细结果？

☐ 没有 ☐ 有 ☐ 不确定

如何评分

每题只选一个：A 明显更好、A 略好、两者相当、B 略好、B 明显更好、无法判断。“相当”表示能够判断但无明确偏好；“无法判断”表示材料不足。可选评论可写中文或英文。每场先完整阅读 A 与 B，再评分。

第 1 场 / 4 • 设计 A

共同生成要求

A cliffside city taxes spoken promises by their weight, and couriers carry unpaid ones between households.

世界概述

- In a vertiginous canyon city, spoken vows take on literal physical mass. The state taxes speech by weight upon utterance, and couriers must physically haul defaulted promises between precariously perched households.

规则与制度

- No sworn vow may be whispered within earshot of an Excise balance beam without paying the ambient acoustic fee.
- A promise-capsule dropped into the abyss cannot be redeemed or litigated once the third echo fades.
- Grinding a covenant before the Silence Assembly delivers a final seal incurs immediate physical custody of the debtor's voice-token.

活动与压力

- Excise Tariff Adjustment & Debt Impound Loop • Assayers weigh incoming promise capsules against registered balances, impounding over-weight vows and raising transit costs when strain spikes, directly driving `state_transit_cost` and altering `state_promise_backlog`. • Impounded spoken capsules pile up, rapidly increasing Unsettled Promise Mass until couriers face total gridlock.
- Gantry Rigging Strain Relief & Abyss Purge Loop • Riggers monitor cable tension under heavy debt traffic, dumping abandoned vow canisters into the depths or conducting emergency repairs, directly modifying `state_bridge_strain` and `state_promise_backlog`. • Pulley cables are fraying under physical promise weight, risking a catastrophic bridge snap if cargo is not cut.

人物与目标

- Tavish Vane • Senior Balance Bailiff — Force the Gantry Runners Syndicate to surrender defaulted promise ampoules to relieve `state_bridge_strain`
- Maren Kye • Gantry Line Marshal — Re-route courier traffic across secondary spans to prevent bridge failure without paying Excise surcharges
- Silas Fenn • Silence Mortar Scrivener — Dissolve toxic public vows to create structural mortar, challenging Excise hoarding of broken pledges

地点与用途

- Excise Weigh-Beam Registry — The Acoustic Excise balances physical pledge-mass against civic ledgers; increasing `state_transit_cost` here drives Under-cleft households in the Low-Cleft Depot to trade unbonded speech.
- Gantry Cable Rigging Depot — Abyss Couriers stage and dispatch heavy floating promises across canyon bridges; rising `state_promise_backlog` here directly increases `state_bridge_strain` on the Gantry Cable Rigging Depot spans.
- The Silence Assembly Mortar Basin — The Silence Assembly pulverizes adjudicated breached vows into civic masonry paste to reinforce weakened cliff ledges.

物件

- Excise Tuning Cudgel • A heavy bronze rod with split tines, used by Bell-warden bailiffs to vibrate and shatter unregistered speech-capsules.
- Lead-Sealed Speech Ampoule • A thick blown-glass capsule filled with dense, luminescent vapor containing a recorded promissory oath.
- Gantry Acoustic Balance • A brass beam balance calibrated with harmonic counterweights to determine the tax liability of spoken debt.

可能采取的行动

- `AssaySpeechPledgeMass`
- `ImpoundSpeechCapsule`
- `ZiplineFreightRun`

玩家进入方式

- Arrive as an audit-deputy assigned to inspect the overtaxed balance beams at the Excise Weigh-Beam Registry.
- Descend into the Gantry Runners Bivouac as an out-of-work courier seeking lucrative defaulted promise routes.

阅读本场 A 与 B 两份材料之后再评分。

第 1 场 / 4 • 设计 B

共同生成要求

A cliffside city taxes spoken promises by their weight, and couriers carry unpaid ones between households.

世界概述

- In a cliffside city, every spoken promise is taxed by weight, while couriers carry unpaid vows between households.

规则与制度

- Every witnessed promise accrues weight-tax until fulfilled, transferred, voided, or paid.
- A stamped vow slip is presumptive evidence, but its wording may be publicly reweighed.
- Bridge passage may be restricted when a household exceeds its posted safety bond.

活动与压力

- Reweigh, settle, reopen • Contest excessive vowweight, assemble witnesses, and settle or amend the result before a bond review closes passage. • Changes unpaid_vowweight and household_liquidity; if balances remain high, activates the unpaid_vowweight-to-bridge_access closure link.
- Custody chain recovery • Trace delayed bundles, repair route failures, and expose or contain tampered echoes before disputes spread. • Changes courier_route_capacity and echo_credibility; prolonged overload activates the courier_route_capacity-to-echo_credibility causal link.

人物与目标

- Mera Venn • Disputed-Vow Reweigher — Win a precedent that lets low-liquidity households split duration taxes, changing household_liquidity and the Weighhouse decision rule.
- Ilyra Quen • Storm-Route Custodian — Secure a neutral storm corridor that prevents bridge_access closures from severing debtor deliveries and worsened household_liquidity.
- Sable Orr • Echo Bailiff and Forgery Listener — Identify the source of circulating forged echoes before compromised rulings trigger bridge_access protests and mass defaults.

地点与用途

- Weighhouse Speaking Hall — The Weighhouse certifies spoken promises and collects tax. Rising unpaid_vowweight is recorded here; overloaded vows are then sent to the Courier Intake Vault.
- Courier Intake Vault — Licensed couriers take custody of unpaid promise bundles and prioritize mature routes. Strained courier_route_capacity here causes late bundles to undermine Echo Court evidence.
- Chain-Gate Bondhouse — Bridge wardens review household safety bonds and chain crossings for delinquent vowweight. Reduced bridge_access here cuts merchant trade at the Bridgehead Exchange afterward.

物件

- Stamped Vow Slip • Brass-edged Weighhouse slip listing spoken terms, witnesses, tax weight, and due date.
- Portable Speaking Scale • A clerk-grade brass scale that weighs wording, duration, and named witnesses in a spoken pledge.
- Sealed Courier Satchel • Waxed windcloth satchel with three custody locks and ribbon slots for unpaid promise bundles.

可能采取的行动

- Reweigh a vow
- Seal a promise bundle
- Tender a safety bond

玩家进入方式

- Carry a late promise bundle whose seal was damaged in a wind crossing.
- Petition to reweigh a family vow that now threatens bridge access.

第 2 场 / 4 • 设计 A

共同生成要求

Inside a colossal biomechanical lung orbiting a gas giant, breathable atmosphere is traded as futures and each exhalation tide changes which institutions can reach one another. Build six or more functionally distinct rooms, twelve deeply inter-dependent named agents, explicit scarce resources, enforceable contracts, rival institutions, and player actions that visibly alter room access, prices, trust, and air pressure. Every room needs one or two premise-specific semantic hero props. Keep the visual language coherent and inspectable: top-down pixel world, oxidized teal membranes, ivory ceramic pressure hardware, saffron signal threads, charcoal shadows, no visible labels, no generic cyberpunk neon, no medieval fantasy, no Beijing or antique-market leakage.

Common targets: 12 agents; 4 player slots.

世界概述

- Inside a biomechanical lung orbiting a gas giant, breathable air is a traded commodity where exhalation tides physically shift institutional access.

规则与制度

- Oxygen is the primary currency and must be shared according to the Lung Accord
- Cartographic data is sacred and tampering with maps is a capital offense
- All diplomatic disputes must be mediated within the Respirator Chambers

活动与压力

- The Air Trade • Players collect atmospheric data to trade for oxygen canisters to sustain their faction. • Rapidly depleting personal oxygen tanks
- Territorial Mapping • Factions compete to map the shifting gas clouds to claim new habitable zones. • Encroaching toxic smog fronts

人物与目标

- Vane 'The Filter' Kaelo • Chief Valve Inspector — To expose the structural decay of the Lower Bronchials before a total collapse.
- Syllas Thorne • Oxygen Arbitrator — To consolidate control over the Alveoli Exchange Floor by manipulating air prices.
- Elara 'Mist-Walker' Voss • Particulate Scavenger — To find the lost blueprints of the original Lung architecture.

地点与用途

- Alveoli Exchange Floor — Trading breath futures and pressure contracts.
- Bronchial Valve Checkpoint — Regulating flow between high and low pressure sectors.
- The Exhalation Lounge — A place for traders to recover and share stale air.

物件

- Alveolar Mesh Filter • A fine teal membrane used to scrub particulate from recycled orbital air. Essential for low-tier lung maintenance.
- Saffron Pressure Tank • High-pressure canister wrapped in saffron threads. Contains three hours of high-purity oxygen for diplomatic summits.
- Consulate Wax Seal • A biometric wax seal used to authenticate breath-debt contracts between orbital stations.

可能采取的行动

- Siphon Surplus Oxygen
- Forge Map Coordinates
- Sabotage Air Filtration

玩家进入方式

- A newly arrived refugee from the Depleted Zones
- A disgraced cartographer seeking redemption

共同生成要求

Inside a colossal biomechanical lung orbiting a gas giant, breathable atmosphere is traded as futures and each exhalation tide changes which institutions can reach one another. Build six or more functionally distinct rooms, twelve deeply inter-dependent named agents, explicit scarce resources, enforceable contracts, rival institutions, and player actions that visibly alter room access, prices, trust, and air pressure. Every room needs one or two premise-specific semantic hero props. Keep the visual language coherent and inspectable: top-down pixel world, oxidized teal membranes, ivory ceramic pressure hardware, saffron signal threads, charcoal shadows, no visible labels, no generic cyberpunk neon, no medieval fantasy, no Beijing or antique-market leakage.

Common targets: 12 agents; 4 player slots.

世界概述

- Inside a biomechanical lung orbiting a gas giant, breathable air is a traded commodity and physical room access shifts with the pressure tides.

规则与制度

- Breath is credit; to waste air is to steal from the collective.
- The High Broker's word is law during the inhalation phase.
- No physical violence is permitted on the Exchange Floor; all disputes are settled by trade.

活动与压力

- The Breath Market • Players buy air futures when pressure is high and sell them when it drops, using the profit to buy better gear or influence. • High economic risk during exhalation.
- Maintenance and Sabotage • Players must keep the lung's systems running while competing factions try to sabotage valves to manipulate prices. • Physical danger from mechanical failure.

人物与目标

- Vane Thorne • High Broker — To bankrupt the Filter Guild and seize control of the Primary Bronchus.
- Kaelen the Sifter • Filter Technician — To prove that Thorne is diluting the air supply with toxic gas.
- Elara Voss • Lung Cartographer — To find the 'Dead Lobe', a legendary room that hasn't inflated in decades.

地点与用途

- The Primary Bronchus — Central transit and air distribution
- Alveolar Exchange Floor — Breath futures trading
- The Mucus Filter — Waste processing and filtration

物件

- Ceramic Pressure Gauge • A handheld device for measuring local air density.
- Saffron Thread Ledger • A book whose pages are woven from data-carrying fibers.
- Standard Air Canister • A portable supply of breathable air.

可能采取的行动

- Adjust Pressure Valve
- Trade Breath Future
- Seal Membrane Leak

玩家进入方式

- Arriving as a new Breath Broker on the Exchange Floor.
- Waking up as a Filter Technician in the Mucus Filter.

第 3 场 / 4 • 设计 A

共同生成要求

A cliffside city taxes spoken promises by their weight, and couriers carry unpaid ones between households.

世界概述

- In the cliffside city of Veridia, spoken promises are tangible, weighed, and taxed. Unpaid promises become physical burdens, carried by couriers between households, shaping the city's economy and social fabric.

规则与制度

- All spoken promises of significant weight must be registered with the Public Promise Registrar.
- Failure to fulfill a registered promise incurs a promise tax, assessed by the Promise Tax Auditor.
- Promise debts are legally binding and can be collected by Senior Debt Couriers.

活动与压力

- Debt Collection & Enforcement • Senior Debt Couriers actively pursue unpaid promise debts, increasing courier workload and potentially decreasing inter-citizen trust.
- High collective promise debt (promise_debt_level) drives increased courier activity (courier_activity_level), straining resources and trust (city_trust_index).
- Promise Tax Assessment & Challenge • Promise Tax Auditors assess new and existing promises, leading to potential challenges from citizens and adjustments by the Council.
- Low city tax revenue stability (tax_revenue_stability) forces the Promise Tax Authority to increase enforcement rigor (promise_enforcement_rigor), leading to public scrutiny and potential disputes.

人物与目标

- Elara Vowkeeper • Promise Tax Auditor — To uncover a systemic flaw in the Promise Tax Authority's valuation algorithms that disproportionately burdens the innocent, thereby improving 'city_trust_index' and reforming the PTA's 'promise_enforcement_rigor'.
- Kaelen Swiftfoot • Senior Debt Courier — To expose the corruption within the Courier Guild that allows certain powerful individuals to avoid their promise debts, thereby improving 'courier_union_satisfaction' and 'city_trust_index'.
- Silas Thorne • Shrewd Merchant — To establish a new, less restrictive system for commercial promises that benefits merchants, thereby increasing 'tax_revenue_stability' for the city while also increasing his own wealth and influence among 'City Merchants'.

地点与用途

- Promise Assessment Chamber — Where the Promise Tax Authority (PTA) assesses and taxes spoken promises, directly influencing the 'promise_debt_level' state variable. High activity here increases debt, which then impacts the 'courier_activity_level' in [截断 / omitted]
- Courier Guild Dispatch — The central hub for the Courier Guild (CG), where couriers receive assignments for transporting unpaid promise debts. High 'promise_debt_level' from the Assessment Chamber directly increases the 'courier_activity_level' here, [截断 / omitted]
- Council of Elders Chamber — Where the Council of Elders (CoE) mediates disputes and interprets ancient promise law, directly influencing the 'city_trust_index' and 'promise_enforcement_rigor'. Their decisions here can reduce 'promise_debt_level' city-wide.

物件

- Blank Promise Scroll • A pristine, unblemished scroll of treated parchment, ready to bear the weight of a new promise. Its surface is receptive [截断 / omitted]
- Personal Debt Ledger • A compact, leather-bound ledger for individuals to meticulously track their own outstanding promises and received debts. Essential for maintaining one's [截断 / omitted]
- Pocket Promise Scale • A finely calibrated, miniature brass scale designed to give a rough estimate of a promise's perceived weight and potential tax [截断 / omitted]

可能采取的行动

- RegisterPromise
- AssessPromiseTax
- DeliverDebtNotice

玩家进入方式

- You have just received a notice for an unexpectedly high promise tax on a minor vow.
- A Senior Debt Courier has approached you, demanding payment for a promise you believe was already fulfilled.

阅读本场 A 与 B 两份材料之后再评分。

第 3 场 / 4 • 设计 B

共同生成要求

A cliffside city taxes spoken promises by their weight, and couriers carry unpaid ones between households.

世界概述

- In a vertical cliff city, every witnessed spoken promise gains measurable weight and a tax liability. When households cannot pay, bonded couriers physically carry the sealed obligation through fragile routes to creditors, guarantors, or courts.

规则与制度

- A promise becomes assessable only when a registered witness or lawful echo can establish its wording.
- Three matching licensed readings make a promise-tax assessment binding unless the Echo Court grants reweighing.
- Liability follows the recorded witness chain; transfer requires acceptance by the recipient or a court order.

活动与压力

- Appeal, Reweigh, Publish • Gather witness tokens in Echo Court, secure three controlled readings in Triple Reading Chamber, and negotiate whether an assessment stands. A fair result lowers Promise Tax Arrears and [截断 / omitted] • The third reading becomes binding before unstable chamber echoes contaminate further cases.
- Refuse, Reroute, Discharge • Triage caskets at Burden Sorting Post, organize refusal at Courier Refusal Shelter, and negotiate a safe route through Anchor Gate and Lift Mouth. Successful delivery reduces Courier Burden [截断 / omitted] • Decay clocks, legal deadlines, and overload flags force unequal dispatch priorities.

人物与目标

- Mara Venn • Contradiction Reader of the Third Brass — Prove that Treasury-neglected chamber fractures caused mass overassessment, forcing the Office of Spoken Weights to reduce promise_tax_arrears through binding reweighings.
- Orris Kett • Bond-Seal Refusal Captain — Win recognized refusal authority from the Burden Post without triggering a dispatch strike that worsens cliff_route_access or promise decay.
- Seli Quoin • Listening-Bolt Cooperative Rigger — Secure cooperative control of anchor repairs from the Bell Treasury while reopening cliff_route_access without concealing dangerous courier loads.

地点与用途

- Triple Reading Chamber — The Office of Spoken Weights and Guild of Licensed Weighers capture witnessed promises; three matching balance readings bind tax assessments. Distorted readings expose changes in civic_resonance_stability, which later [截断 / omitted]
- Threshold Lien Office — Inspectors convert binding assessments into household liens, visibly threatening lift keys and cistern shares while ledge households petition for exemptions. Rising promise_tax_arrears here increases dispatch volume at the [截断 / omitted]
- Burden Sorting Post — The Burden Post stores and prioritizes sealed obligations by decay risk, deadline, and receiver capacity. Higher promise_tax_arrears sends more caskets here; rising courier_burden then produces congestion and closures [截断 / omitted]

物件

- Quartet of Promise Weights • Four calibrated brass weights for testing a promise's duration, scope, risk, and dependents. Licensed readings are admissible when three sets [截断 / omitted]
- Household Arrears Dial • A wall-mounted brass dial that advances with posted assessments and retreats when vowmarks clear. A black sector marks the household's [截断 / omitted]
- Courier Strain Chime • Harness chimes change pitch as carried liability approaches the legal burden cap, warning both courier and Warden gate crews.

可能采取的行动

- Triple-Read a Captured Promise
- Refuse an Unstable Casket
- Reweigh a Contested Echo

玩家进入方式

- A red overload flag at Burden Sorting Post forces a choice between delaying legal dispatches and risking promise decay.
- A household asks for representation before a third reading in Triple Reading Chamber makes its disputed tax binding.

第 4 场 / 4 • 设计 A

共同生成要求

A municipal archive licenses gravity vectors as property. Couriers carry temporary down-directions, families mortgage ballast, and arbitrators settle accidents caused by counterfeit vectors. Build exactly six connected, functionally distinct rooms and twelve socially entangled agents. Make gravity rights affect movement, access, prices, disputes, and visible room conditions rather than serving as lore. Include one or two large world-specific semantic machines or props per room. Use cobalt glass, bone-white ceramic, vermilion plumb lines, graphite shadows, and brass measurement hardware in a coherent top-down pixel-art canon. Avoid generic cyberpunk, medieval fantasy, Beijing references, signs, captions, readable letters, logos, and text baked into art.

Common targets: 12 agents; 4 player slots.

世界概述

- A municipal hub where gravity is a licensed commodity, managed through tradeable vectors and ballast mortgages.

规则与制度

- All spatial shifts must be logged with the Central Ledger.
- Counterfeit gravity vectors are punishable by permanent grounding.
- Collisions between private pocket dimensions require immediate mediation.

活动与压力

- Vector Auditing • Players investigate spatial anomalies, collect data, and file reports to stabilize the sector. • Increasing spatial instability
- Smuggling Crackdown • Players track down counterfeit gravity sources and seize illegal vector-shifting devices. • Bureaucratic deadlines

人物与目标

- Vaelen Thorne • Lead Vector Auditor — To recover the lost gravitational constant of the Old City
- Silas Vane • Ballast Broker — To corner the market on heavy metals to control the city's descent
- Kaelith Sun • Maintenance Rigging Specialist — To find the source of the 'Weightless Rot' eating the cables

地点与用途

- Vector Licensing Desk — Issuing temporary gravity-rights for visitors.
- Ballast Mortgage Vault — Storage of physical ballast stones used as collateral.
- Arbitration Chamber — Resolving disputes over overlapping gravity vectors.

物件

- Standard Cobalt Plumb-Bob • A heavy cobalt glass weight used to establish the local vertical in shifting gravity zones.
- Vector-Lock Seal • A bone-white ceramic wafer used to legally freeze a spatial vector for 24 hours.
- Ballast Mortgage Ledger • A thick brass-bound book recording the debt-weight of a specific district.

可能采取的行动

- Recalibrate local gravity constant
- Audit spatial ledger for vector drift
- Forge a temporary transit permit

玩家进入方式

- A sudden spatial collapse in the residential sector.
- A summons to the Bureau of Weight and Measures.

第 4 场 / 4 • 设计 B

共同生成要求

A municipal archive licenses gravity vectors as property. Couriers carry temporary down-directions, families mortgage ballast, and arbitrators settle accidents caused by counterfeit vectors. Build exactly six connected, functionally distinct rooms and twelve socially entangled agents. Make gravity rights affect movement, access, prices, disputes, and visible room conditions rather than serving as lore. Include one or two large world-specific semantic machines or props per room. Use cobalt glass, bone-white ceramic, vermilion plumb lines, graphite shadows, and brass measurement hardware in a coherent top-down pixel-art canon. Avoid generic cyberpunk, medieval fantasy, Beijing references, signs, captions, readable letters, logos, and text baked into art.

Common targets: 12 agents; 4 player slots.

世界概述

- In a city where gravity is a licensed municipal utility, citizens must lease 'down-vectors' to remain grounded. The Archive manages these licenses, handling the physical ballast and mathematical proofs required to keep the population from drifting away.

规则与制度

- All citizens must maintain a minimum weight of 60kg while in public halls.
- Unlicensed buoyancy exceeding 0.5 meters from the floor is a finable offense.
- Tampering with a municipal plumb line is considered high treason.

活动与压力

- The Vector Cycle • Acquire a license, retrieve a rod from the vault, calibrate it in the workshop, and use it to access high-gravity zones. • Rods decay over time and must be recharged or replaced.
- The Ballast Trade • Buy low-density ceramic, trade it for high-density lead, and use the weight to stabilize yourself in low-g areas or sell for profit. • Market prices fluctuate based on the Archive's current gravity reserves.

人物与目标

- Archivist Vane • Chief Registrar — To recover the 'Primal Vector' stolen by a buoyancy cult.
- Merchant Kael • Ballast Broker — To corner the market on high-density ceramic.
- Arbitrator Nox • Gravity Judge — To expose the corruption in the vector licensing process.

地点与用途

- The Intake Atrium — Processing new gravity claimants and weighing visitors.
- Vector Licensing Vault — Storage of active gravity certificates and vector-rods.
- The Ballast Exchange — Trading physical weights to offset vector fluctuations.

物件

- Scribe Stylus • A brass stylus for engraving ceramic tablets.
- Bone-White Tablet • A blank ceramic tablet for official records.
- Cobalt Ink • Deep blue ink that glows slightly under UV light.

可能采取的行动

- Calibrate Vector Rod
- Apply Ballast
- Challenge Gravity License

玩家进入方式

- Arriving as a new claimant at the Intake Atrium.
- Starting as a junior technician in the Calibration Workshop.
